EDUCATION

2023 - 2027

**B.E. Software Engineering
(Cybersecurity)**

College of Science and
Technology, Royal University of
Bhutan

Cybersecurity, DevOps, Cloud
Computing, System Design,
Microservices, Databases, QA, IoT

SKILLS

- Python, JavaScript, TypeScript, C++, SQL, Bash
- React, Next.js, Node.js, REST APIs
- PostgreSQL, MongoDB, Redis, Supabase
- Docker, Kubernetes, AWS, Linux, Git
- GitHub Actions, Jenkins, ELK Stack
- Burp Suite, Nmap, Wireshark, Metasploit

ACHIEVEMENTS

Innovation Bootcamp 2024

Winning Team - Nu. 200,000
prize

APNIC Workshop

Cyber Security Month,
GovTech - 2024

PROFILE SUMMARY

Final-year Software Engineering student specializing in Cybersecurity, with interests in cloud infrastructure, DevOps, web security, and full-stack development. I have hands-on experience with Docker, Kubernetes, CI/CD, cloud networking, and software testing through academic projects and an internship at GovTech Bhutan.

WORK EXPERIENCE

Software Engineering Intern

Sep - Nov 2024

GovTech Agency - Department of Software Development

- Tested in-development systems with the DSD team and reported defects and edge cases to developers.
- Worked within the team's daily development and review cycle and completed a three-day APNIC workshop during Cyber Security Month.

PROJECTS

Containerised App with Automated Delivery

2025

- Containerised a React/Node/PostgreSQL app and built CI/CD using GitHub Actions and Jenkins; tested a related workload on a three-node Kubernetes cluster.

Docker • Kubernetes • GitHub Actions • Jenkins • Linux

Sakura Notes - Blogging Platform

2025

- Built a full-stack blogging platform with Google OAuth, social features, Supabase and Vercel deployment.

React • Vite • Supabase • Vercel

Real-time Quiz Platform

2025

- Built host-created rooms with unique join codes and live multiplayer joining over WebSockets.

React • Node.js • WebSockets

SECURITY PRACTICE

- Network: Nmap and Wireshark for enumeration/traffic analysis; Metasploit practice and service hardening with ACLs, RBAC and TLS.
- Web: PortSwigger labs covering prototype pollution, XXE, password-reset flaws and template injection using Burp Suite.
- CTF & Forensics: 2025 inter-college CTF; CORS, CSRF, authentication bypass, API security, SSRF and insider-threat forensics.
